Summary

I am a passionate FullStack Developer with a keen sense of creativity and innovation in digital products. Proficient in gathering and analyzing business requirements; converting it to technical solutions. I can work on both frontend and backend technologies. I am committed to contributing to team learning and enhancing digital transformation journeys.

Education

Vignan's Institute Of Information Technology

Dec. 2021 – May 2025

Bachelor of Technology in Computer Science

Visakhapatnam, Andhra Pradesh

Experience

COINCENT

February 2024 – April 2024

Full Stack Developer Intern

Remote

- Developed basic web applications including a chat application and a single-page website, gaining hands-on experience in full-stack web development. Acquired proficiency in both front-end and back-end technologies, enhancing skills in HTML, CSS, JavaScript, and server-side programming.
- Collaborated with teams from Microsoft and IBM, applying best practices in software development and project management. Successfully translated project requirements into functional applications, demonstrating adaptability and problem-solving abilities in a professional setting.

CARRUM MOBILITY SOLUTIONS

May 2024 – May 2025

Software Developer Intern

Gurugram, Haryana

- Proficient in Node.js, Express.js, Sequelize, and MySQL for building robust and scalable server-side applications. Skilled in React.js, Tailwind CSS, and JavaScript for developing interactive and responsive user interfaces.
- Design, develop, and maintain backend services and APIs, ensuring efficient data management and seamless integration with frontend components.

Projects

HOPE | *Html, Css, Bootstrap, EJS, API, Node.js*

- Developed a web app for small workers, enabling job notifications and management. Implemented user registration and notification systems for job alerts.

Uber-Clone | *react.js, node.js, express.js, API, MongoDB*

- Implemented key functionalities allowing users to create accounts, log in, and book trips by specifying source and destination points
- Developed the driver interface where drivers can view available rides, fill in details, and accept ride requests. Added history sections for both users and drivers to track past trips and ride activities.

Chat Application | *react.js, node.js, express.js, Socketio, MongoDB*

- Developed a real-time chat application facilitating instant messaging and communication between users. Integrated features for text-based chatting, user authentication, and message notifications to enhance user engagement and interaction.

Hotel Management System | *MongoDB, Express, ReactJS, Node.js*

- Implemented filters based on price and location to facilitate easy search and selection of hotels. Developed a user-friendly booking interface allowing guests to select rooms, specify dates, and confirm reservations.

Technical Skills

Languages: C, C++, Python, Unix, Java, SQL

Technologies/Frameworks: Html, Css, Javascript, React, TailWindcss, Bootstrap, JQuery, API

Tools/Platforms: Figma, Clerk, UI UX design, AuthO, Git, GitHub, Microsoft Excel

Databases: Node.js, MongoDB, Express.js, MySql

Certifications

- The Complete Web Development Bootcamp - Udemy
- JavaScript Essentials - Cisco
- Python Essentials - Cisco
